BACKGROUND AND GOALS

Having worked and experienced what many industries have had to offer, I now seek a challenging role that will utilize my complete skill set. I am learning the MERN front and back end full stack and seek a role where I can develop into a great asset for my given employer.

Outside of work, I have played basketball since the age of 7 and have co-captained numerous teams managing uniform, training and rostering (recently co-managing 2 teams, presently run a weekly scrimmage).

I am happy to travel for work, long commutes are not an issue to establish a career role.
